USER MANUAL FOR CONTINENTAL BINOCULAR

1. Twist-Up Eyecups
2. Center Focus Ring
3. Eye Piece
4. Mount Adapter Port (1/4"-20 thread)
5. Objective Lens

⚠ DANGER Never Look Directly At The Sun With Your Binocular, As It May Cause Serious Damage To Your Eyes.

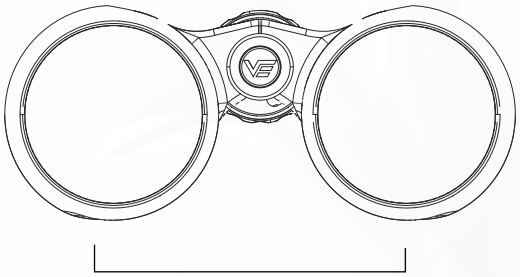

NOTE: *Remove the caps on the front and back of the binocular before use.*

EYECUP

The binocular is fitted with eyecups delivering a comfortable view of the full field. If you do not wear glasses when viewing, the binocular is used with the eyecups fully extended. If you wear glasses when viewing, the binocular is used with the eyecups set in closer.

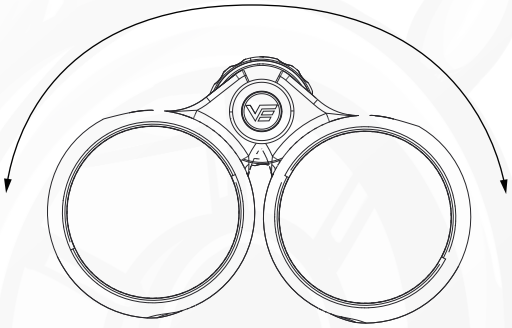

ADJUST THE INTERPUPILLARY DISTANCE

The IPD stands for interpupillary distance. That's the distance between the centers of your pupils (in other words, how far your eyes are apart). Match the IPD of your eyes and your binocular by rotating the barrels in or out until you see a single image free of shading.

IPD

Distance between the centers of the ocular lenses.

Rotate the barrels in or out to match the IPD of your eyes with that of the binocular.

CENTRAL FOCUSING

For the best results, follow this process to properly adjust the center focus .

Use the center focus knob, and focus your eyes on the object with fine detail. Adjust the center focus wheel until it the image is as sharp and clear as possible.

MAINTENANCE

Your binocular optics, though amazingly tough, is a precision instrument that deserves reasonable cautious care.

- When cleaning the lens, first blow away any dirt and dust, or use a soft lens brush. Fingerprints and lubricants can be wiped off with lens tissue, or soft microfiber clean cotton cloth, moistened with lens cleaning fluid.
- All moving parts of the binocular are permanently lubricated. Do not try to lubricate them.
- No maintenance is needed on the binocular's external surface, except to occasionally wipe off dirt fingerprints with a soft cloth.

STORAGE

Avoid storing the binoculars in hot places, such as the passenger compartments of vehicles on hot days. The high temperatures could adversely affect the lubricants and sealants. A vehicle's trunk, a gun cabinet, or a closet is preferable. Never leave the device where direct sunlight can enter either the optics lens.

⚠ Protect the binocular from drop or impact and do not force any of the moving parts beyond the limits. Do not disassemble the binocular by yourself.
